For Third Batch Dated 14th April 2016 to 16th April 2016

Submitted by Shri U. Muktieh, General Manager, DCIC, East Garo Hills and Smti. Thoibi Ch. Momin, Industrial Promotion Officer, DCIC, East Garo Hills.

Number of beekeepers: - 40
Date of arrival: - 14th April 2016 to 16th April 2016

Date: - 14th April 2016

The first session of the day was dedicated to the Theory classes and introduction to all the working tools and machineries in the training centre which was followed by distribution of working tools to enable them to start working for the second session.

The Second session started off by the class on cutting the timber and construction of brood chamber and super chamber.

Date: - 15th April 2016

The first session started off by the class on cutting the timber and construction of Floor Board Frame, assembling works and queen gate.

The second session they were engaged in the work comprising of planning of Timber cutting, chipping and construction of inner cover frame and assembling works.

Date: - 16th April 2016

The first session of the day was on cutting the timber and construction of comb frame and assembling works. There on the training was concluded by a valedictory function and distribution of certificates and finally they were taken to the horti-hub and there they were shown the beauty of garden, flowers and vegetation. All the participants have been asked to replicate the same in their own backward and village. This session was projected with an aim of creating awareness on environment. After which they proceeded to their respective destinations.

Conclusion:-

All the 40 (forty) bee keepers has been given 3 (three) number bee box and 1 (one) number bee veil.

The group was found to be well behaved, with curious mind and eager to learn. During the class they were interactive and during the practical session they participated with activeness.

Feedback:- On analysis of the feedback (question answers from bee keepers) it has been concluded that participants highly appreciated the training program and beneficial and during the course of discussion and interaction they have promised to start rearing bees and to capture colonies from the wild.
